When you are little,the whole world feels like a big playground.I was living in Conyers, Georgia the summer it all happened.I was a second grader,but my best friend Stephanie was only in the first grade.Both of our parents were at work and most of the time they let us go our own way.

It was a hot afternoon and we decided to have an adventure in Stephanie's basement.As I opened the basement door,before us lay the biggest room,full of amazing things like guns,dolls,and old clothes.I ran downstairs,and spotted a red steel can.It was paint.I looked beyond it and there lay even more paint in bright colors like purple,orange,blue and green.

"Stephanie,I just found us a project for the day.Get some paintbrushes.We are fixing to paint."She screamed with excitement as I told her of my secret plans and immediately we got to work.We gathered all the brushes we could find and moved all of our materials to my yard.There on the road in front of my house,we painted bit stripes(条纹)of colors across the pavement(人行道).Stripe by stripe,our colors turned into a beautiful rainbow.It was fantastic!

The sun was starting to sink.I saw a car in the distance and jumped up as I recognized the car.It was my mother.I couldn't wait to show her my masterpiece.The car pulled slowly into the driveway and from the look on my mother's face,I could tell that I was in deep trouble.

My mother shut the car door and walked towards me.Her eyes glaring,she shouted, "What in the world were you thinking?I understood when you made castles out of leaves,and climbed the neighbors' trees,but this!Come inside right now!I stood there glaring back at her for a minute,angry because she had insulted(侮辱)my art.

"Now go to clean it up!"Mother and I began cleaning the road.Tears ran down my cheeks as I saw my beautiful rainbow turn into black cement.

Though years have now passed,I still wonder where my rainbow has gone.I wonder if,maybe when I get older,I can find my rainbow and never have to brush it away.I guess we all need sort of rainbow to brighten our lives from time to time and to keep our hopes and dreams colorful.

Student participation(参与)in the classroom is not only accepted but also expected of the student in many courses.Some professors base part of the final grade on the student's oral participation.Although there are formal lectures during which the student has a passive role(i.e.listening and taking notes),many courses are organized around classroom discussions, student questions,and informal lectures.In graduate discussions the professor has a“manager”role and the students make presentations and lead discussions.The students do the actual teaching in these discussions.

A professor' s teaching method is another factor(因素)that determines the degree and type of student participation.Some professors prefer to control discussion while others prefer to guide the class without controlling it.Many professors encourage students to question their ideas.Students who object to the professor's point of view should be prepared to prove their positions.

In the teaching of science and mathematics,the controlling mode of instruction is generally traditional,with teachers presenting formal lectures and students taking notes.However,new educational trends have turned up in the humanities and social sciences in the past twenty years.Students in education,society,and history classes,for example,are often required to solve problems in groups,design projects,make presentations,and examine case studies.Since some college or university courses are “practical” rather than theoretical,they pay more attention to “doing” for themselves.

A.science and mathematics

B.the humanities and social sciences

C.informal lecture courses

A.has not changed much

B.pay attention to students' studying instead of teachers' teaching

C.is much more important than that of science and mathematics

41.The reason why some professors ask students to make presentations and lead discussions is that_____.

A.these professors are often not well prepared before class

B.these professors want to stress “doing”

C.these professors want to test the students' abilities

D.these professors are not willing to teach theory

Lisa was running late. Lisa, 25, had a lot to do at work, plus visitors on the way: her parents were coming in for Thanksgiving from her hometown. But as she hurried down the subway stairs, she started to feel uncomfortably warm. By the time she got to the platform, Lisa felt weak and tired—maybe it hadn't been a good idea to give blood the night before, she thought. She rested herself against a post close to the tracks.

Several yards away, Frank, 43, and his girlfriend, Jennifer, found a spot close to where the front of the train would stop. They were deep in discussion about a house they were thinking of buying.

But when he heard the scream, followed by someone yelling, “Oh, my God, she fell in!” Frank didn't hesitate. He jumped down to the tracks and ran some 40 feet toward the body lying on the rails. “No! Not you!” his girlfriend screamed after him.

She was right to be alarmed. By the time Frank reached Lisa, he could feel the tracks shaking and see the light coming. The train was about 20 seconds from the station.

It was hard to lift her. She was just out. But he managed to raise her the four feet to the platform so that bystanders could hold her by the arms and drag her away from the edge. That was where Lisa briefly regained consciousness, felt herself being pulled along the ground, and saw someone else holding her purse.

Lisa thought she'd been robbed. A woman held her hand and a man gave his shirt to help stop the blood pouring from her head. And she tried to talk but she couldn't, and that was when she realized how much pain she was in.

Police and fire officials soon arrived, and Frank told the story to an officer. Jennifer said her boyfriend was calm on their 40-minute train ride downtown—just as he had been seconds after the rescue, which made her think about her reaction at the time. “I saw the train coming and I was thinking he was going to die,” she explained.

43. What was the most probable cause for Lisa's weakness?

- A. She had run a long way.
 - B. She felt hot in the subway.
 - C. She had done a lot of work.
 - D. She had donated blood the night before.
44. Why did Jennifer try to stop her boyfriend?
- A. Because they would miss their train.
 - B. Because he didn't see the train coming.
 - C. Because she was sure Lisa was hard to lift.
 - D. Because she was afraid the train would kill him.
45. How did Frank save Lisa?
- A. By lifting her to the platform.
 - B. By helping her rise to her feet.
 - C. By pulling her along the ground.
 - D. By dragging her away from the edge.

46. When did Lisa become conscious again?
A. When the train was leaving.
B. After she was back on the platform.
C. After the police and fire officials came.
D. When a man was cleaning the blood from her head.

47. The passage is intended to _____.
A. warn us of the danger in the subway
B. show us how to save people in the subway
C. tell us about a subway rescue
D. report a traffic accident

D

The next time you try for a high-ranking post, you could let your possible boss listen to a recommending(推荐) phone call “made” by US President George W. Bush or British Prime Minister Tony Blair.

Of course, neither of them could really do that for you—you would just “borrow” their voices.

AT&T labs will start selling speech software that it says is so good at reproducing the sounds of a human voice that it can recreate voices and even bring the voices of long-dead famous people back to life.

The software, which turns printed text into speech, makes it possible for a company to use recordings of a person's voice to say things that the person never actually said.

Possible customers for the software, which is priced in the thousands of dollars, includes telephone call centers, companies that make software that reads digital(数字的) files aloud, and makers of automated voice devices(装置). The advances raise several problems. Who, for example, owns the rig to a famous person's voice? Some experts even believe that new contracts(合同) will be drawn that include voice-licensing clauses.

And although scientists say the technology is not yet good enough to commit fraud(假冒), would the synthesized(合成的) voices at last be able to trick people into thinking that they were getting phone calls or digital audio recordings from people they know?

Even Mr. Fruchterman, one of AT&T labs' possible first customers, said he wondered what the new technology might bring. “Just like you can't trust a photograph any more,” he said, “you won't be able to trust a voice either.”

48. With the help of the speech software it is most possible _____.
A. to improve a famous person's speech
B. to say what you want in another's voice
C. to make a speech much more easily
D. to help you to find a better job
49. If the speech software were widely used, _____.
A. people would no longer believe each other
B. it would not be necessary to go for a speech by a famous person
C. no radio or TV broadcasters would be needed
D. recording of a voice alone would not be taken as a proof in the court
50. According to the passage, you can infer that _____.
A. the software will turn out to be an immediate success in the market
B. the government will forbid the sale of the software in the market

- C.it's hard to decide whether the software will enjoy popularity
D.the software will soon prove to be nothing but rubbish
